

LCB Education Packs

2025-2026

- AQA Unit Award Scheme
- Functional Skills Exams
- S.T.E.A.M+
- English
- Maths

Suitable for young people
aged 4- 16

Who are we?

LCB Education is a trading name of Little Crafters Boxes Ltd are a UK based manufacturer and educational resource supplier, bringing together all the elements needed for interest led, hands on learning, with progressive access to recognised certification.

We are a UK-based company dedicated to inspiring children through hands-on, eco-friendly crafts that make learning fun! Each activity we create is designed to encourage creativity, curiosity, and confidence, while supporting educational goals.

The company has grown rapidly since its launch in 2021, and now offers a certified learning programme for learners aged 4-19, consisting of AQA accredited craft kits, workbooks, online lessons, and remote functional Skills Exams.

Our resources align with the **AQA Unit Award Scheme**, meaning learners can learn new skills and still earn recognised certification as they complete activities.

We offer a comprehensive curriculum for you to follow, along with options to make it as bespoke as you like with your own chosen units.

Our mission is to make education accessible in every corner of the country, to every child

Working together with

How does the Education Pack Work?

In simple terms, you can register with us in an academic year to gain access to certification. The company releases around 15 units of study each month at different levels. You are free to pick as many or as few of those as you would like throughout the year to complete (however you want).

LCB Education also manufactures resources (crafts, workbooks and online lessons) to support with these units. You can opt in to use some/ all of these for a more “done for you” style service, or find your own resources elsewhere to complete units.

Minecraft (Unofficial)- January 2025

There are no restrictions on age groups for the different awards and you can do as many as you like from each list. They have been separated by difficulty level to help provide guidance.

Pre Entry level	Entry Level	Functional Skills
Budding Crafters 118088 Exploring water with support (Science) 86967 Producing pictures in the style of mark rothko (Art and design) 70244 Plaster mould casting (Art and design) 72163 Mathematics: properties of simple 2d shapes (Maths)	Crafters 108057 Chemistry: elements, mixtures and compounds (unit 4) (Chemistry) 119498 Introduction to minecraft (unit 1) (ICT and computer science) 114437 Introduction to coding using minecraft (Computer science) 115813 Making a simple led torch (Design and technology) BU1335 Making a soft toy (Sewing, textiles and fashion) 15018 Maths: geometry (Maths)	Skilled Crafters 120884 Exploring the history of video gaming (Computer science) 117230 Weaving (Sewing, textiles and fashion) 113178 Surviving in extreme environments (Geography) CE4657 Calculating the volume of solids (Maths)

PLASTER MOULD CASTING

Level: Pre-Entry Level

In successfully completing this unit, the learner will have

demonstrated the ability to

1. half-fill a bowl with cold water
2. sprinkle the plaster powder into the cold water until it forms a peak
3. agitate the water/plaster mixture with their hand
4. wait for the water/plaster mixture to heat up
5. pour the plaster into the mould
6. wait for the plaster to go 'off' in the mould
7. turn out a plaster cast product.

How much does it Cost?

Our most comprehensive package (also used by EOTAS learners and Local Authorities

More about our Services

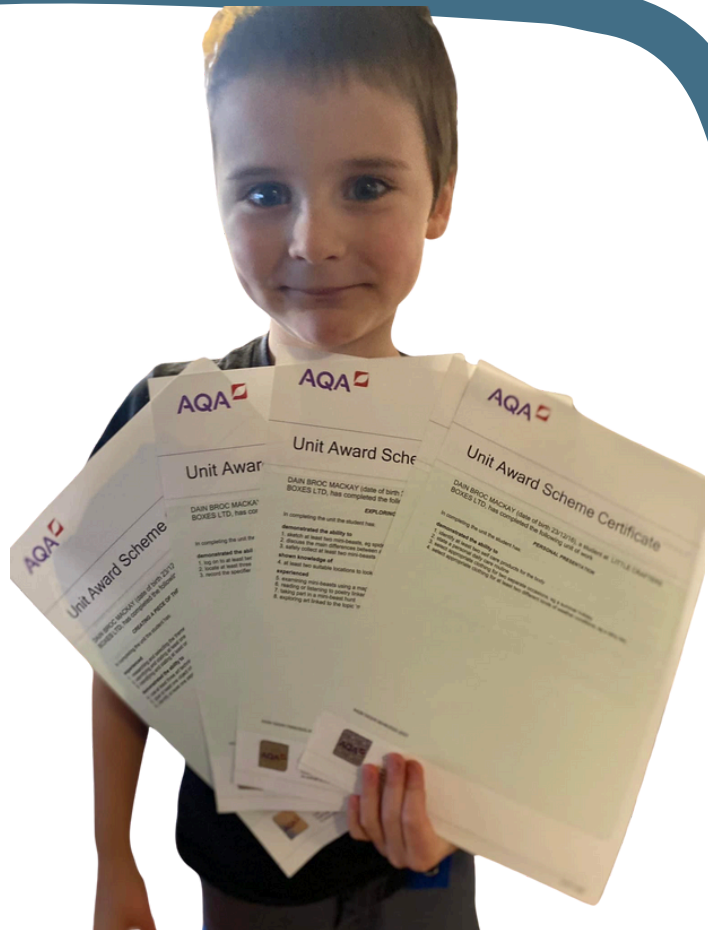

AQA UAS CERTIFICATES

The Unit Award Scheme (UAS) is a unique way to record learner achievement. Its 'can do' approach is used to boost student confidence, engagement and motivation.

UAS allows all students to engage with learning and have their achievements formally recognised.

Students are rewarded with a certificate each time they successfully complete a unit of learning. They can build up a portfolio of certificates to evidence their skills, knowledge and experience.

The scheme boosts confidence, increases engagement and improves motivation, helping students to make progress on their lifelong learning journey.

- Every craft has a direct link to a unit released by LCB Education each month.
- You can add boxes onto and education pack subscription or purchase them in their own right as and when required from www.littlecraftersboxes.co.uk

More about our Services

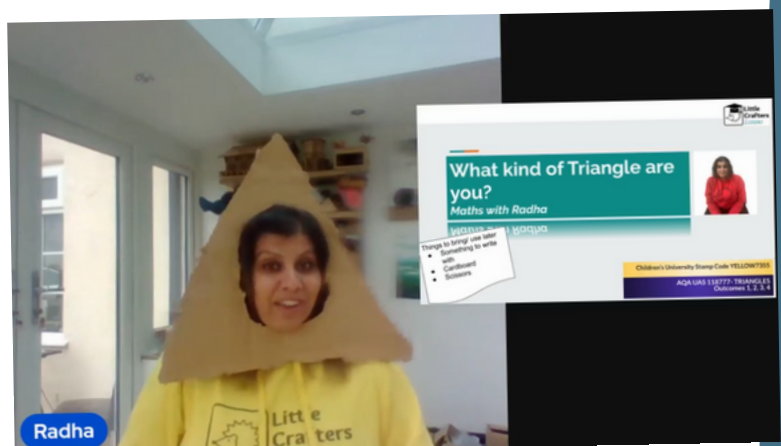

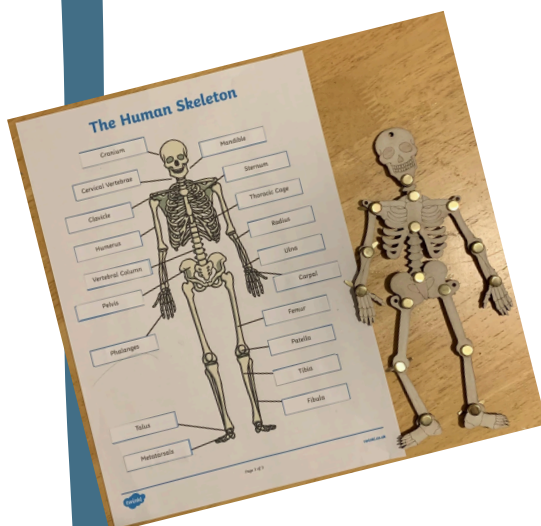

LCB LESSONS

A timetable of 10- 12 lessons is released each month (in connection with the AQA Unit awards) and taught online by our teachers via a dedicated Facebook group and YouTube channel. It is all accessible via the website with free practical challenges and worksheets made available to children.

Those that attend and complete the work provided can often complete an entire award in a single session and submit it for certification.

Lessons can be added to an education package or purchased as a separate subscription. There are free downloadable workbooks with all lessons.

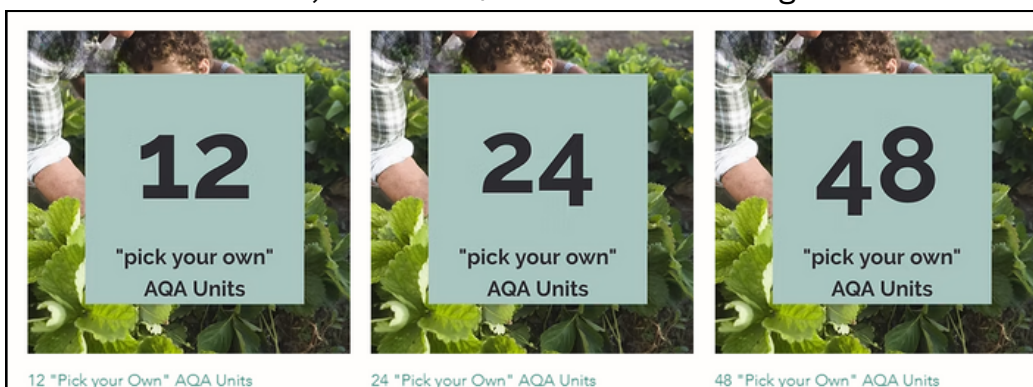

Additional Services

LCB Education is not just a resource shop that will sell you a product and then disappear. We will hold your hand the whole way and there are SO many more services you can dip into if you need them.

P.Y.O AQA UNITS

Great if you would like to choose your own units from the AQA database, instead of/ as well as following LCB curriculum.

£199

£389

£770

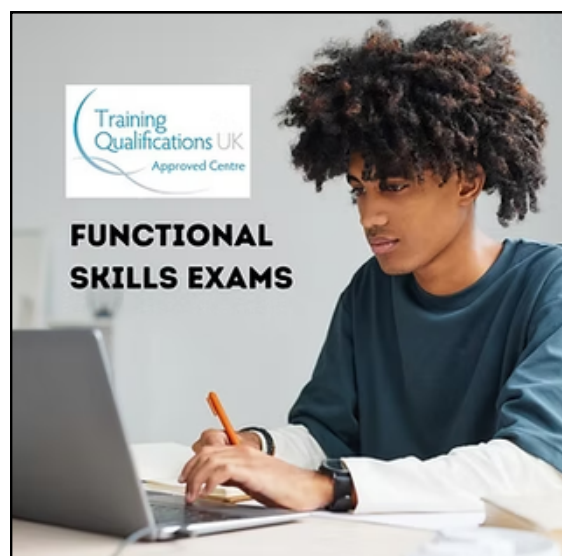

Alternatively you could just purchase these as singles for £25 each

FUNCTIONAL SKILLS EXAMS

Learners can now sit Functional Skills Exams (L1 or L2) in English and Maths either remotely, from their homes, or on site at our Lincs based HQ.

LCB Education packs are fully resourced to contain everything they need to prepare too. Exams, like our other services can be added into a learning package or purchased on their own.

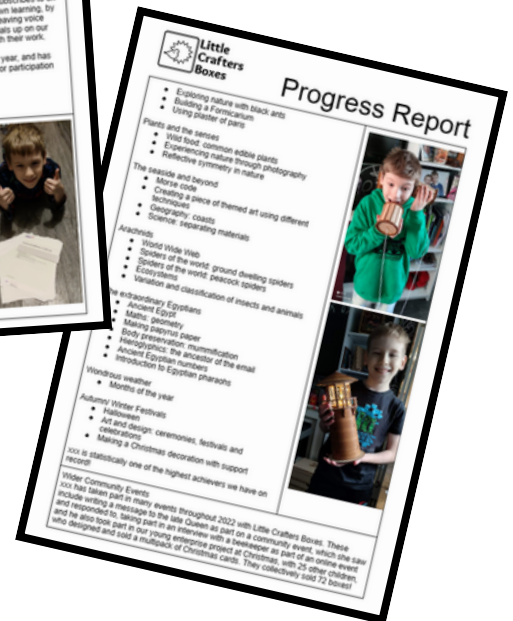

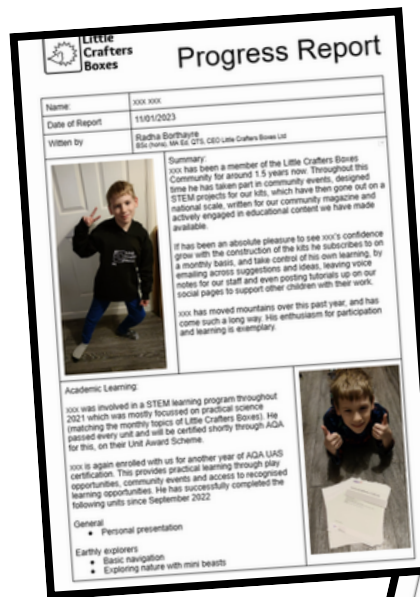

£264 including a free resit

PROGRESS REPORTS

Our team really go above and beyond to get to know the learners we work with and can provide a comprehensive report to showcase their learning journey during their time with us. These are wonderful souvenirs and provide sound evidence of learning for your local authority too if you are home educating.

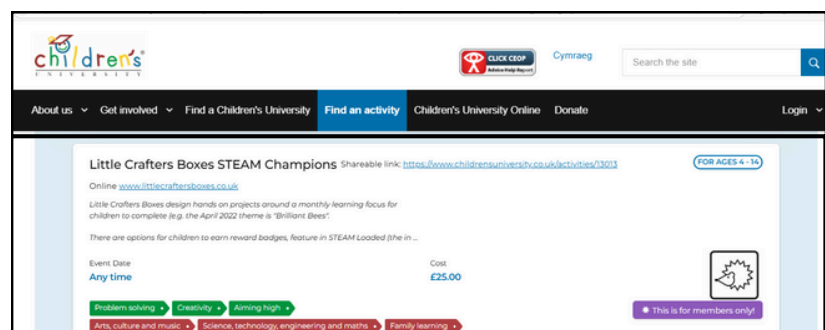

£17.99 on request

CHILDREN'S UNIVERSITY HOURS

Younger learners can subscribe with Children's University to gain hours for the "outside the box" learning that they do to reach learning milestones. Little Crafters Boxes can contribute to this each month too!

£3.50 per month

Why LCB Education

SEND friendly

- The AQA Unit award scheme is traditionally used in alternative provisions and workplaces. It gives children access to nationally recognised certification and enables us to accept learner work through witness statements from parents, videos, audio as well as student completed work meaning that those pupils who may not engage well with academia can still accomplish certification for their work.
- Lessons are tailored to those with extra needs, kept short and interactive with practical aspects to keep them engaged
- Little Crafters Boxes which embraces the SEND of the children we work with making it an ideas for EOTAS candidates.
- We offer a comprehensive STEAM program which engages these marginalised children

Children are at the heart of everything we do.

They are involved in decision making to do with future learning themes, regularly invited to take part in the company blog, online (and in person) events and have the opportunity to talk to professionals from different walks of life. Recent examples of this include an interview with a NASA astronaut, talk with Dr Tony Redmond (founder of the nightingale hospitals during the pandemic) and Interview with a beekeeper!

Family Support

- A very friendly and helpful engaged online community of families with a "we're all in this together" approach
- Round the clock support for parents
- Feedback through marking from our dedicated education team, which encourages children to resubmit and accomplish certification rather than to give up at the first hurdle

Practical crafts and build projects encourage children to engage and develop their motor skills whilst learning STEM and exploring educational theories

What do our Families Say?

My boy asd/ learning difficulties and medical issues. He could not adapt to school and was always on his own and when he would have meltdowns in class and no-one could understand him he was left under table or in corner until I'd get call to take him home. He was never listened to he was being bulled. In his own words i was left like a homeless person on floor and he has never forgotten that. That was it I couldn't watch him cry everyday going to school and waiting for phone calls so decided it was time to deregister him from school at age 10. 2 years in now with little Crafters and best thing we ever did. Luke has come on leaps and bounds learning new ways. Taking part thriving, achieving some much and taking interest in many things. It's going to be 3rd year going in to LCB x

The Aqa awards have built that much confidence for Phinley in particular hes now accessing other qualifications and working towards his functional skills. He wouldn't have the confidence or self esteem of it wasn't for the build up with the AQA. He loves the builds and is so quick at doing them. He loves the ones that are complex and you have to work them out. Well have a bit of a mix next year as Ezra likes doing them too. He prefers the lessons and learning the information from the workbooks so a slightly different style of working. He likes more art and science and anything that involves being able to move.

My child was seriously underweight due to AFRID and being forced to eat in the dinning room. Frequently lost in school as his sensory needs was take a message to another class and he decided that class was more interesting. (one day he was found after a hour in the travelling performers dressing room) He was increasing choosing to be non verbal but attacking us in frustration when he got home. Bullying led him to hiding in bushes at playtime. Since we've joined LCB, not once has he chosen not to speak, not a single violent attack and he's attempting a few foods at his request. LCB was our saviour, only budding at first to build confidence, but it's a flexible learning option that doesn't impose do this now, just do it in the way that suits the child. Its also helps with the amazing feedback from Elisabeth and Hazel to motivate him more.

School trauma/ burnout, wouldn't eat, only did two weeks in school out of the 3 months when he started, when we first started we took it slowly, he didn't like writing, but loved making the crafts, fast forward a few years he loves writing and is straight in the box and asking what aqa's he's got to do, he sets a target for the year and tries to beat the number of aqa's he does for the certificates each year, he really enjoys it and is finally happy and in a positive place
